Melissa's Story

The Melissa Froio Foundation is named after Melissa Froio. In March of 2009, at the age of 14 Melissa passed away from a rare genetic disease known as Neuronal Ceroid Lipofuscinoses (NCL) or commonly known as "Batten Disease".

Batten Disease is an inherited, degenerative, neurological disease that mostly affects young children. In a disease of this type, each parent carries a copy of a specific gene that is defective. A copy of this gene, from each parent, is passed onto the affected child. At this time there is no cure or treatment to stop the progression of the disease. Unfortunately, this disease always results in the death of the child at a relatively young age.

In April of 1999, Melissa was diagnosed with the Late Infantile Variant form of Batten's Disease. This disease took away most of Melissa's fine motor skills including her ability to see, eat, walk, and talk. From the time of her diagnosis until her passing, Melissa attended the St. John of God Community Services, her special needs school.

The Melissa Froio Foundation was formed to raise money to help find a cure for this disease. In that regard, we are hosting the **11th Annual Melissa Froio Foundation Golf Tournament** on Friday June 18, 2010 at Ramblewood Country Club, Mt. Laurel NJ.

All proceeds from the tournament are used to support the mission of the **Melissa Froio Foundation** – to increase public awareness and to raise money to help find a cure for Batten Disease. A secondary goal is to provide financial assistance to Melissa's special needs school - St. John of God Community Services.
